OVERVIEW

One platform. The entire care chain.

Afri CNAM enables African governments and public institutions to digitize their Universal Health Coverage (UHC) via mobile and modernize the entire national healthcare system — from enrollment of formal and informal citizens, to digital prescriptions, pharmacy dispensing, automated provider reimbursement, and real-time monitoring of every transaction. Sovereign, secure, and adaptable to every country.

THE PLATFORM

Six pillars, one system.

Mobile enrollment

Register every citizen — formal or informal — in minutes via phone, USSD or field agent, with optional biometric KYC.

Pharmacy dispensing

Real-time scan, validation and dispensing of medicines, with full national stock traceability.

Real-time monitoring

National dashboard: live transactions, fraud detection, public spending and epidemiological indicators.

Digital prescriptions

Doctors issue electronically signed prescriptions, instantly transmitted to pharmacies in the network.

Automated reimbursement

AI-controlled invoices verified and reimbursed to providers within 72 hours.

Sovereign security

Data hosted in your country, end-to-end encryption, GDPR and local law compliance.

THE JOURNEY

From enrollment to reimbursement, in 4 steps.

01**Enrollment**

Formal and informal citizens registered via mobile, optional biometric identity.

02**Consultation**

The doctor identifies the insured, reviews their record, issues the digital prescription.

03**Pharmacy**

Scanned dispensing, traceable medicines, direct payment via the platform.

04**Reimbursement**

AI-controlled invoices, providers automatically reimbursed within 72 hours.

BUILT FOR EVERYONE

Three interfaces, one ecosystem.

Citizens

- Digital insurance card
- Find doctor & pharmacy
- Secure medical history
- Reimbursement notifications

Healthcare workers

- Unified patient record
- Electronic prescriptions
- Integrated teleconsultation
- Guaranteed direct payment

Governments

- National dashboard
- AI fraud detection
- Real-time budget steering
- Epidemiological statistics

SOVEREIGNTY & SECURITY

Infrastructure built for Africa.

Afri CNAM is designed from the ground up to respect the digital sovereignty of African nations. Infrastructure is hosted inside the country, operated by local teams, and configurable for each country's legislation, currency, language and healthcare structure. The deployment timeline is contractually guaranteed: 12 weeks from signature to national launch.

KEY INDICATORS

What the platform guarantees.

12

weeks to deploy an entire nation

99.9%

uptime, even offline

72h

to reimburse a provider

100%

of formal & informal insured covered

Let's talk about your national program.
